

# Gobble Facts! Multiplication

This activity can be used as a cut/paste activity or a whole group activity. Laminate the pieces for more durability, when using as a group activity.

To use this as a cut and paste activity, give each student a set of eight feathers and a turkey. Each set should have 4 feathers with a math fact and 4 with the answer to that math fact. The math fact should be glued to the turkey first, with its corresponding answer feather next. Have the student cut out each feather and the turkey. The student should color his turkey and the feathers.

To use this activity as a whole group activity/game...

Give each student a turkey and six to eight math fact feathers.

Say a math fact, asking the students to raise a hand if the answer is known, but ONLY if he/she has THAT math fact feather. Call on the first student to raise his/her hand. If he/she answers correctly, the feather is added to his turkey. The first student to complete all of the math facts for his turkey wins.
